

ARCGIS DASHBOARDS

TRAINING OBJECTIVES

This training aims to create dashboards with maps, graphs, gauges and other visual elements to help with decision-making.

At the end of the training, participants will be able to:

- Access the portal (ArcGIS Online / ArcGIS Enterprise)
- Prepare data for integration into a Dashboard
- Create and configure a Dashboard
- Add visual elements to the Dashboard (indicators, graphs, etc.)
- Change the layout and rendering of a Dashboard
- Save and share a Dashboard

TARGET AUDIENCE

All audiences

PREREQUISITE

Have completed the ArcGIS Enterprise Portal Access training and have an ArcGIS Online or Enterprise Creator account

Coming to training with your own laptop and Esri licenses installed and active

EDUCATIONAL RESOURCES

Digital course material given to the trainee (with concrete cases, practical exercises, technical sheets)

Evaluation questionnaires and certificate of completion of training

DURATION > 1 day

REGISTRATION

Email > formation@arx.it

Consulting us for accessibility for people with disabilities

PROGRAM

Please note that ArcGIS Dashboards training requires a Creator account, as there is content creation (a Viewer or an Editor is not enough).

ArcGIS Dashboards does not require a mastery of ArcGIS Pro, on the other hand, it seems essential to have followed a general training on ArcGIS Enterprise or to be already a user of it (in particular for the Data and Web Map part which are inputs of any Dashboard)

MORNING

ACCESS TO THE PORTAL

Access to the portal (ArcGIS Online / ArcGIS Enterprise) and reminders about its use

CREATING A DASHBOARD

ArcGIS Dashboard from a web map and existing data

AFTERNOON

ADDING VISUALS

Addition of visual elements to the dashboard: indicators, graphs, gauges, lists...

CHANGING THE LAYOUT

Changing the layout and rendering of your dashboard

BACKUP AND SHARING
