

ARCGIS EXPERIENCE BUILDER

Beginner Level

TRAINING OBJECTIVES

This training is for people who want to set up cartographic web applications easily and efficiently, without any notion of web development.

Upon completion of this course, the trainee will have the ability to deploy a mapping web application from scratch on ArcGIS Online / Enterprise and will be able to:

- Understand how Experience Builder works
- Set up a map web application
- Master the different components of Experience Builder

TARGET AUDIENCE

GIS Project Manager, GIS Technician, Geomatics Specialist

PREREQUISITE

Have a basic knowledge of GIS and have ArcGIS Online access or, if applicable, ArcGIS Enterprise access

Coming to training with your own laptop and Esri licenses installed and active

EDUCATIONAL RESOURCES

Digital course material given to the trainee (with concrete cases, practical exercises, technical sheets)

Evaluation questionnaires and certificate of completion of training

DURATION > 2 days

REGISTRATION

Email > formation@arxit.com

Consulting us for accessibility for people with disabilities
